ARTIFICIAL INTELLIGENCE

HOSTED BY MEP **DANIEL HANNAN**

DISCOVER AI LIKE NEVER BEFORE

In a time where European states are putting limitations on new technologies they deem to be disruptive, Artificial Intelligence (AI) is on the rise and is here to stay. Should European states continue to legislate and bury the potential of technology under regulations, or should they take a step back and allow AI to flourish? How will AI change employment? How should AI be regulated? Is AI different from previous technological revolutions? How will societies adapt to AI?

SPEAKERS CONFIRMED

John Shawe-Taylor Chairholder of UNESCO Chair on Artificial Intelligence, Professor at University College London.
