

INVITATION

Artificial Intelligence, Future Economics and Emerging Technologies

Organized by: Ludwig von Mises
Institute and The Cobden Centre

Date: 20th January 2020

Time: 4:00 – 6:00 p.m.

Venue: The European Parliament
(Room: JAN6Q1)

Rsvp before 15th January 2020

Conference Program

The world is in the process of being transformed by a combination of technologies - artificial intelligence, blockchain, the internet of things and biotechnology among others. Artificial intelligence has the potential to be more revolutionary than any other technology. An innovative artificial intelligence event put together in the European Parliament will focus on the social and economic aspects and how AI could transform the European economy over the next generation. During this event topics such as the economic effects of AI or the “AI arms race” can be discussed.
